

3 PIECE LAP PANEL

3 piece Lap Panel is a segmented add-on armor component that can be used either as abdominal or groin armor, depending on mounting location and ride height. 3 piece construction allows better leg movement and comfort but adds weight compared to traditional 1 piece panels.

INCLUDED COMPONENTS

- 3x 3A ballistic insert
- 3x fabric cover for ballistic inserts
- Waist strap
- Direct mount click-in buckles
- Elastic lower attachment
- Velcro drop component
- Drop down webbing components for additional abdominal armor integration

COMPATIBILITY & SETUP

- Fits PALS belts
- Fits plate carriers with PALS or velcro on front
- Stand alone use possible

USE CASE

- Plate carrier: 1) drop down from placard velcro for extended abdominal coverage 2) Combine with abdominal armor for groin coverage
- Belt: 1) Mount click-in buckles to belt PALS for quick release and weight transfer to hips 2) Mount over your existing belt with built in slots
- Stand alone: use included waist strap with or without a battle belt for groin coverage

SPECIFICATIONS

- Made from X-Pac (M05 variant from Cordura), Cordura laminate and Curv Tactical composite
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee on nylon, plastic and composite components

3A products can be delivered only to NATO countries.

L4 PERFORMANCE

ABDOMEN PANEL

Abdomen Panel for 5x11 soft armor. Increases ballistic coverage on front or back of your plate carrier.

INCLUDED COMPONENTS

- Soft armor cover with PALS
- Velcro drop down kit

COMPATIBILITY & SETUP

- Compatible with all plate carriers that use velcro placards or velcro plate closure on bottom (ie JPC, L4PC, ATLAS)
- Horizontal and vertical PALS on both sides.
- Attaches to your armor carrier with PALS between pouches and carrier or Velcro (pictured).
- Designed for 5x11 (does not include ballistic insert)
- Can be connected to our 3 Piece Lap Panel

USE CASE

- Plate carrier: increase ballistic coverage on abdomen area

SPECIFICATIONS

- Made from Cordura and Cordura laminate
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee

ATLAS

ATLAS Plate Carrier is a heavy duty fully structural carrier designed for heaviest loads and ultimate comfort. Optimal for extended missions and maritime operations.

INCLUDED COMPONENTS

- ATLAS Front Plate Bag
- ATLAS Rear Plate Bag
- ATLAS Harness
- Structural Shoulder Pads
- Single band cummerbund
- Adhesive velcro tabs for EUD mounting
- Everything needed for comfortable armor carriage

COMPATIBILITY & SETUP

- Compatible with Crye Precision and L4 Performance back panels
- Placards: compatible with L4 Performance Tango and ATLAS Placard. Compatible with aftermarket height adjustable placards
- Direct PALS pouch and placard mounting optimal for maritime operations
- Full composite frame allows superior dry weight and water outflow

USE CASE

- For extended use and medium to heavy loads with or without rucks
- Maritime operations

SPECIFICATIONS

- Made from Curv Tactical composite with laminated camo skin, X-pac and Cordura laminate
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee
- Articulating shoulders allow optimal load distribution and comfort with and without layers for all body types.
- Internal EUD tray accepts up to 20x11cm devices.
- Weight 940g (medium carrier with shoulder pads, tubes and cummerbund)
- Loop velcro for pads and side armor on inner side of harness arms and back (no pads included)

DUMP LAP PANEL

Dump Lap Panel features a low profile internal stretch pouch that can be used as a dump pouch, general purpose or to store specific items with velcro inserts.

INCLUDED COMPONENTS

- Dump Lap Panel
- Removable elastic insert

COMPATIBILITY & SETUP

USE CASE

- Add ballistic coverage below your front plate bag
- Use Dump Lap Panel as a dump pouch, storage for bangs or as a general purpose pouch

SPECIFICATIONS

- Weight: 500 g with 3A insert
- Made from stretch fabric + X-pac or Cordura laminate
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee
- Ballistic compartment next to body has a small inner pouch ie for car keys
- Optional 3A insert

3A products can be delivered only to NATO countries

L4PC FRONT PLATE BAG

Maritime L4PC Front Plate Bag is AVS compatible as standard. Integrated phone mount (Patent Pending) is built to the frame of the carrier and produces a slick front so that EUD does not interfere with magazines placed below it.

INCLUDED COMPONENTS

- Maritime L4PC Front Plate Bag
- Shock cord for PTT mounting
- Cord for limiting how much EUD tray opens
- Adhesive velcro for EUD
- Removable side release buckles for placards

Compatibility & Setup:- Plate carriers: Crye Precision JPC, AVS and L4 Performance L4PC, ATLAS. L4PC front plate bag is compatible with most other carriers also as long as they accept velcro shoulder straps and velcro/tube/buckle cummerbunds

- EUD: Phone mount 100x160mm or smaller. Larger ones will fit in a pinch but are not optimal
- FS Tubes: internal attachment points
- Placards: Crye Precision, Swift Clip, G-hook, ATLAS and L4 compatible
- Harness: Crye Precision AVS and L4 Performance L4PC Harness + ATLAS compatible
- PALS: pouches and placards can be direct mounted to frontal lower PALS: optimal for maritime operations

Use Case- Start your L4PC build piece by piece

- Upgrade your current plate carrier with harness compatibility, low profile EUD tray and wide placard compatibility

SPECIFICATIONS

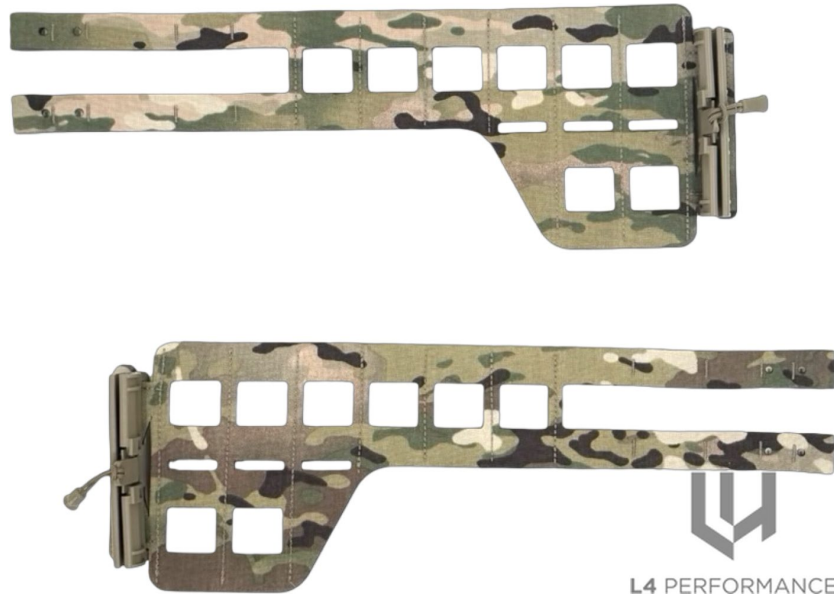

- Weight: 276g
- Made from Cordura laminate and Curv Tactical Composite
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee
- Internal PTT attachment points
- Slits inside plate bag allow cable routing without snag hazard
- Curv Tactical composite frame
- Shoulder straps are compatible with 2" First Spear Tubes, front lower sides with 4" First Spear Tubes

L4 PERFORMANCE

L4PC STRUCTURAL CUMMERBUND

UPDATE: From 12.09.2026 on the cummerbund comes without FS Tubes to improve availability for customers

L4PC Structural Cummerbund is a composite reinforced cummerbund with L4 Performance / Crye Precision standard rear attachment and First Spear Tube front attachment.

INCLUDED COMPONENTS

- Structural cummerbund main components to left and right hand side
- Elastic cord for rear attachment
- Flat cord lock for fast size adjustment
- FS Tubes for frontal mounting are not included: use 4" First Spear tubes for optimal fitment

COMPATIBILITY & SETUP

- Compatible with rear plate bags of Crye Precision JPC, SPC, AVS, JPC-R + L4 Performance Maritime L4PC
- Compatible with any front plate bag with 1) internal tube mounting points, 2) tube compatible placard (L4 placards) or 3) tube adapter
- Fits 33-45 inch chest

USE CASE

- Plate carrier: use structural cummerbund on your plate carrier for fast quick detach functionality and increased load carriage capability
- Unique L-shaped tube attachment allows pouches to ride closer to body, decreasing experienced bulk on front of cummerbund attached pouches

SPECIFICATIONS

- Weight: 252g with FS tubes
- Made from Cordura laminate and Curv Tactical composite
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee

MARITIME L4PC

Updated version of our legacy L4PC plate carrier with less weight and more functions. Medium to heavy load structural plate carrier.

FEATURES

- Integrated low profile EUD mount
- PTT attachment points
- Evac mechanism on rear plate bag: 1. lower part attaches to users belt 2. by pulling the evac handle the webbing releases 3. person dragging the user can stay in upright position, allowing easier dragging and better situational awareness 5. user will not choke to plate carrier as the force will be applied on the pants belt
- Laser cut holes allow fast water outflow
- Structural cummerbund with FS Tube closure
- Structural frame on front and rear bag for optimal load transfer
- Structural shoulder pads
- Accepts PALS or velcro side armor pouches ie Triangle

INCLUDED COMPONENTS

- Maritime L4PC Front Plate Bag
- Maritime L4PC Rear Plate Bag
- L4PC Structural Cummerbund
- Structural Shoulder Pads
- Shoulder Tube Quick Release
- Velcro adhesive for EUDs
- Female quick release buckles for Swift Clip placards

COMPATIBILITY & SETUP

- Harness: Compatible with Crye Precision AVS harness (not included) and L4 Harness
- Placards: Crye Precision placards, G-hook and buckle (swift clip) placards
- Back Panels: Accepts Crye Precision and L4 Performance back panels
- Frontal PALS allows securing pouches and hard mounting placards directly to front plate bag: optimal for maritime operations
- Admin pouches or dedicated molded EUD mounts can be used over PALS on EUD tray

USE CASE

- Choose for medium to heavy loads (+5kg)

COMPATIBILITY & SETUP

- Compatible with Crye Precision AVS, JPC, SPC, JPC-R & L4 Performance L4PC, ATLAS
- Back panel zipper is Crye Precision / L4 Performance standard: fits Crye and L4 back panels. UCAS panels have a longer zipper which you can secure with our Zipper Clip or a piece of paracord
- Cummerbund compatibility: L4 Performance / Crye Precision standard rear attachment
- Compatible with L4 and Crye plate carrier harness
- Elastic sides accept plates with different thicknesses

USE CASE

- Plate carrier: Replace your old rear plate bag for reduced weight and increased functionality

SPECIFICATIONS

- Made from 500/500d Cordura laminate
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee
- Medium size fits SAPI M sized armor, Large fits SAPI L

STRUCTURAL SHOULDER PADS

Will fit plate carriers with velcro on shoulder straps ie JPC.

Onewrap horizontal straps allow securing pc straps + ease cable, hydration and antenna management. Top of the structural shoulder pads is loop velcro and bottom is premium stretch that works like loop velcro which allows 1) using one-wrap to provide more cable securing points 2) allow adding extra velcro padding ie Crye AVS Padding for missions when weight of the carrier gets extremely heavy.

Structural shoulder pads have a composite sheet on top of padding to distribute weight to a wider area. Best add-on component for those who want to improve their issued kit or those who experience stress on shoulders when wearing armor for extended periods.

INCLUDED COMPONENTS

- 2x Shoulder pad

COMPATIBILITY & SETUP

- Compatible with plate carriers that have hook velcro on bottom of shoulder straps ie L4PC, ATLAS, Crye Precision JPC, AVS, SPC, JPC-R
- Remove old shoulder pads, attach new ones to hook velcro on shoulder straps
- Elastic or One-Wrap cable / hose routing on top

USE CASE

- Plate carrier: Replace your standard shoulder pads with structural ones to increase wear comfort

SPECIFICATIONS

- Weight: 42 g / 1.48 oz
- Made from Cordura, Velcro, 4-way stretch, closed cell foam and Curv Tactical composite
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee

ADAPTIVE RIG SYSTEM (ARS) BRAVO MODULE

A thin, lightweight chest rig harness designed for maximum comfort, even when worn with rucks. Highly adjustable yoke, backstrap, and rear straps provide a secure fit and versatile use. Alternative rear straps are included for added flexibility.

INCLUDED COMPONENTS

ARS Bravo module (yoke/harness)

Elastic backstrap

Elastic rear straps

Non-elastic rear straps

Side release and other buckles required for configuring the straps

COMPATIBILITY & SETUP

Attaches to Adaptive Rig System modules, The PUZZLE, and WCSIG Rig

Compatible with most aftermarket chest rigs featuring 1" side release buckles (Crye Precision, Ferro Concepts, Spiritus Systems, and others)

Laser-cut PALS on harness for routing cables, hydro, or attaching PTTs

Elastic and non-elastic rear straps can be attached in multiple positions, allowing flexible setup from micro rigs to full LBE systems

USE CASE

Perfect for a wide range of chest rig applications

Works under rucks and backpacks

SPECIFICATIONS

Thin, lightweight construction

Highly adjustable for custom fit

ADAPTIVE RIG SYSTEM SPLIT RIG SETUP WITH MAG SLOTS

A modular chest rig setup built around the Adaptive Rig System, combining the ARS Bravo harness with two ARS Tango modules. Configure it as a split rig, wide chest rig, or compact micro rig—adapting to your loadout and mission requirements.

Hook Velcro backing allows the modules to be used as placards or to mount additional pouches between the rig and body (e.g. L4 Echo Module / Map pouch).

INCLUDED COMPONENTS

1× ARS Bravo module (harness)

2× ARS Tango modules (MOLLE panels with integrated mag slots)

COMPATIBILITY & SETUP

Configurable as: Split rig (6 rifle magazines) Wide chest rig (6 rifle magazines) Micro rig (3 rifle magazines)

Compatible with the Adaptive Rig System ecosystem and most placard-based setups

Laser-cut PALS and hook Velcro backing allow direct attachment to plate carriers or layering with pouches

Tango modules can be attached side-by-side or stacked using MALICE clips

Includes all required buckles, side straps, and hardware for full configuration (via Bravo and Tango modules)

Tango modules feature loop Velcro-lined internal compartments

Includes adjustable side walls and ride height adjusters for each Tango module, supporting radios, magazines, water bottles, and similar items (fits 5.56, 7.62, and .308 magazines, among others)

Adjustable walls can be removed and replaced with L4 elastic mag inserts (choose from the drop-down menu)

Includes shock cords and plastic pull tabs for secure retention of up to six magazines

USE CASE

Highly adaptable chest rig system for a wide range of loadouts

Scalable configuration from a compact micro rig to a full-sized chest rig

Works under rucks and backpacks

SPECIFICATIONS

Tango modules are six PALS columns wide

Loop Velcro interior for inserts (optional elastic mag inserts available, choose from the drop-down menu)

Internal compartments are adjustable with side walls

ADAPTIVE RIG SYSTEM TANGO MODULE

Adaptive Rig System Tango module is a 6 PALS column wide component that works both as a placard or chest rig. Internal velcro kangaroo slot for inserts allow using the module with different calibers.

INCLUDED COMPONENTS

- 1x Adaptive Rig System Tango module
- 2x Adjustable side walls to fit different magazine sizes
- 3x Adjustable ride height tabs to fit different height magazines from 30rd AK to 10rd AICS magazines
- 3x Shock cord for retention
- 3x Plastic click pull tabs, optimal for both straight and curved magazines
- Click-in buckles for plate carrier mounting or chest rig build customization
- Adaptive Rig System Side Strap for split-front chest rig frontal adjustment, back strap extension or customization

COMPATIBILITY & SETUP

- Chest Rigs: Adaptive Rig System product family
- Next to body PALS allows hard mounting the component to any PALS surface with MALICE clips, one-wrap or zip ties

USE CASE

- Plate carrier: use Adaptive Rig System Tango as a placard
- Belt: can be direct mounted to PALS
- Chest rig: can be used as a micro rig, wide chest rig or a split-front chest rig
- Components can be joined with included removable buckles and MALICE clips

SPECIFICATIONS

- Made from Cordura Laminate
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee
- PALS on 5 sides
- Taller than US standard walls provide better multi caliber fitment ie 3x 7,62x39 AK magazines

PUZZLE CHEST RIG KIT

A highly modular chest rig platform built around The PUZZLE system, allowing MOLLE pouches to be attached directly to each other and scaled to mission needs. Configure your setup from a compact micro rig to a full-width or split-front chest rig—simply add pouches.

Kit includes the Adaptive Rig System Bravo module for a complete harness solution, making it ready for immediate setup

INCLUDED COMPONENTS

PUZZLE base components (for connecting 8 pouches)

ARS Bravo module (yoke/harness)

COMPATIBILITY & SETUP

Compatible with most shoulder straps using 1" buckles (including ARS Bravo module provided in the kit)

ARS Bravo module includes shoulder straps, backstrap, and additional rear straps

Compatible with Adaptive Rig System ecosystem

Allows direct pouch-to-pouch attachment (no traditional base needed)

Included components allow attaching up to 8 pouches together

Pouches can be attached on both sides

Use multiple sets for expanded setups (split rigs, larger rigs, or belt kits)

2024 update: compatible with split-bar tube systems (First Spear, 2M ROC)

Supports optional add-ons such as PUZZLE zipper modules and PUZZLE Velcro components

USE CASE

Fully modular chest rig platform adaptable to mission-specific loadouts

Scalable from micro rigs to full chest rigs or split-front configurations

Works with rucks and backpacks

Ideal for users who want maximum flexibility without fixed layouts

SPECIFICATIONS

Modular PUZZLE system for direct pouch integration

Compatible with a wide range of aftermarket pouches and components

NIR-compliant materials

Made in Finland

L4 PERFORMANCE

PUZZLE VELCRO MODULE

PUZZLE velcro module transforms your PUZZLE setup to a placard or makes your rig dangler compatible. Hook velcro with 6-wide molle and loop backer.

The module can be shortened by cutting columns (not rows) off by leaving 1cm extra fabric to the side and burning the laminate edge after cutting.

NIR-compliant materials.

THE PUZZLE

Made in USA Puzzles available from Tracer Tactical

A super modular chest rig base kit. Just add the pouches, shoulder straps and a backstrap. Compatible with all shoulder straps that have 1" buckles, including our ARS Bravo module which includes both shoulder straps and the backstrap.

The included components allow attaching 5 pouches to each other. Order 2 sets for more pouches or a split rig build, 3 sets or more for a belt kit build.

Compatible with Adaptive Rig System components and molle to velcro adapter.

NIR-compliant materials.

L4 PERFORMANCE

WCSIG RIG

WCSIG is a fixed pouch chest rig that is made from high quality mil-spec materials in Finland.

The chest rig is designed to carry the essentials: ammo, water and comms.

4x double mag pouch (each slot fits 2x5.56, 2x7.62x39, 1x.308, radio)

2x radio pouch (will also fit 1l nalgene or a pistol with a IWB holster)

2x general purpose pouch (GP will fit up to 6x m4 mags each)

- molle on shoulder straps, under mag pouches and on the side of the GP pouches

Chest rig, pull-tabs, shoulder straps and a back strap are all included.

Shoulder straps are attached with 1" side release buckles and can be changed to any after market straps, including our Adaptive Rig System Bravo.

The base of the rig is laser cut from two pieces of cordura laminate. While laminate is twice as expensive as regular cordura (of which most rigs are made from), it reduces the amount of seams which adds durability, reduces manufacturing time and makes the affordable pricing possible. The shock cords wear out after years of use but they are replaceable and the rig will last from father to son.

Upgrade your WCSIG with our Adaptive Rig System Bravo yoke, L4 x EURMED IFAK insert, TQ pouch and frag pouches

ARS compatible

NIR compliant materials.

L4 PERFORMANCE

LOAD CARRIAGE ASSEMBLY (LCA)

Choose the widest option according to your waist size. Size in cm refers to width of the frame & padding. In addition to this the webbing straps add +25cm per side.

LCA structured belt
LCA removable padding
LCA yoke

PROPERTIES

- removable padding with anchoring points
- inner loop velcro
- PALS surface with loop allows attaching pouches with molle or onewrap
- removable shock cord routed to the frame for tightening pouches close to body
- AustriAlpin polymer cobra buckle
- composite frame

Choose the widest option according to your waist size. Size in cm refers to width of the frame & padding. In addition to this the webbing straps add +25cm per side.

Load Carriage Assembly is a belt + harness system that allows carrying light to heavy loads as stand alone or with armor. Unique layering system allows running outer frame only when wearing multiple layers of clothes (ie winter) which would normally push pouches to the back, making them difficult to reach. Removable retention loops for extra pouch retention. Inner side (with frame) accepts velcro padding (ie Crye Precision) for optimizing fitment to the user.

NIR-compliant materials.

SUPER MODULAR BELT

Super Modular Belt is a modular, structural two piece belt. It's designed for light loads (ie sidearm, fast mags, dump, IFAK). Modularity allows running modules together or separately - for example only mags on weak side - or adjusting the width according to seasonal demands (additional layers in cold environment)

PACKAGE INCLUDES

- inner belt
- main belt with Cobra buckle
- 3 structural modules

If between sizes, go for the bigger one. Excess webbing is easy to cut

DOUBLE MAG POUCH, M4/AK

Ultralightweight double magazine pouch designed to fit both M4 and AK magazines. Features the L4 Tilt design for improved fit and accessibility with curved AK magazines, while maintaining a low-profile and secure retention.

INCLUDED COMPONENTS

Double mag pouch with tilt feature

COMPATIBILITY & SETUP

- Fits 2× M4 or 2× AK magazines
- L4 Tilt feature optimizes angle and access for AK magazines
- Shock cord retention allows adjustable tension

USE CASE

- Suitable for both M4 and AK loadouts
- Adjustable retention allows open-top functionality ie when preparing for assault
- Can be used for 1 or 2 mags. Running 1 per pouch as standard will give you the possibility to carry more when needed while keeping your profile slimmer in normal use
- Flapped double mag pouches work well as general purpose pouches and fit ie a pistol, IFAK, water, smoke
- Plate carrier: run one on your weak side cummerbund, next to the plate, for extra mags, a smoke or a water bottle
- Belt: run 1-3 per side to store magazines and to have extra space for items you are given without preparation (flare gun, drinks, smoke)
- Chest rig: run 1-6 to store magazines and miscellaneous items.

SPECIFICATIONS

- Weight: 42 g / 1.48 oz
- Composite stiffener for easy reindexing
- Shock cord retention system
- Made from X-Pac (m05 and m90 in 500D/500D laminate)
- NIR-compliant materials
- Made in Finland
- 10 Year guarantee

L4 PERFORMANCE

LARGE GP

Lightweight large general purpose pouch. Removable stretch insert for small tall items. Ultralight and stores flat when empty.

Included Components:- Large GP pouch

- Removable elastic insert

COMPATIBILITY & SETUP

- Pouch attaches to PALS (molle)
- Width 3 or 4 PALS columns, depending on selected product variant
- Loop velcro lined interior allows attaching different velcro inserts
- Stores flat when empty
- PALS on front and sides for piggybacking ie TQ pouches on sides, or XXS GP on front for a zippered extra pouch for smaller items
- Designed to fit large items: larger than a M67 frag. For smaller items ie batteries you want to use a zippered pouch ie our XXS GP

USE CASE

- Belt: 1) back of the belt as an IFAK or stored flat empty, providing extra storage when needed 2) Run the pouch on your side(s) for bulk magazine, linked ammo or frag storage
- Plate carrier: 1) 5 or 7 o'clock as an IFAK or NOD storage 2) one on weaker side for misc items 3) 1-4 on rear plate bag as item specific "back panel"
- Chest Rig: use 1-2 on front for large items
- Backpack: extend your PALS compatible ruck storage capacity by attaching Large GP pouches directly to your ruck

Specifications:- NIR-compliant materials

- Weight 77g
- 10 year guarantee

NALGENE BIKINI POUCH

Nalgene Bikini Pouch is designed to fit 0,5/16oz or 1liter/32oz nalgene and water purification tablets. The pouch has removable and storable paracord strap and elastic pouch for small items(purification tabs, lighter or gym locker key). Attachment to belt, PALS or over the shoulder with paracord strap.

The shoulder strap allows storing nalgene next to your skin in winter to prevent freezing. For additional freezing prevention, store the bottle upside down and route paracord inside the pouch and shock cord from both sides (last picture) Fits a white monster also.

No nalgene bottle included. Choose a Tritan bottle so that you can put boiling water and such to it.

NIR-compliant materials.

L4 PERFORMANCE

WIDE XXS GP

A wider version of our XXS GP, this zippered general-purpose pouch is made from 4-way stretch material. It stays flat when empty and expands when needed, providing a low-profile yet versatile storage solution.

Included Components:- Wide XXS GP pouch

- Removable stretch insert

Compatibility & Setup- 6 or 8 wide PALS attachment: Width refers to number of PALS columns. Most placards are 6-wide: choose this one if you don't have a 4 mag placard or such. Our Tangos and Quad also accepts 8-wides.

- Mounts to cummerbunds, belts, placards, plate carriers, or backpacks
- Perfect for Adaptive Rig System Tango modules
- Loop Velcro strip inside for organizing items

Use Case- Ideal for admin items, snacks, or mission-specific needs

- Holds 40 mm rounds, fragmentation grenades, flare gun with flares, distraction devices, medical items, and more
- Flexible and secure storage while keeping items accessible
- Plate carrier: 1) mount Wide XXS GP on the front of your placard as admin / general purpose pouch 2) mount 1-3x Wide XXS GP pouches on your rear plate bag as a "back panel" for a poncho and a stripped MRE 3) use Wide XXS GP as a side armor pouch on your cummerbunds
- Chest rig: use Wide XXS GP on your strong side as a general purpose pouch to keep the profile low for optimal elbow placement when shooting
- Belt: attach Wide XXS GP to your 6 o'clock as a flat GP, IFAK or extra storage: it will stay flat and unnoticeable when empty

Specifications- 4-way stretch construction

- Flat profile when empty, expands under load
- M05 fabric is less stretchy than other options
- Weight: 58 g
- NIR-compliant materials
- Made in Finland
- 10 year guarantee

CPS-6 CHEMLIGHT PULL SYSTEM

CPS-6 Chemlight Pull System allows you to carry six chemlights on your kit. The system attaches in between PALS pouches and leaves the bottom of chemlights visible. Once you pull from the bottom, steel wire cuts through the chemlight plastic loop and chemlight releases.

WEIGHT	40 g (packed)	
PACKAGE	300 × 100 × 30 mm

MOLLE TO VELCRO ADAPTER

This adapter turns any molle surface to velcro surface. Choose size, color and velcro surface for the adapter. For standard size placard 6-wide loop is the correct one. Coyote brown for multicam carriers.

Add optional surface mount buckles for placard conversions: these add top buckle mounts and attach to both horizontal or vertical PALS.

NIR compliant materials.

COLOURS	Black, Coyote Brown, Multicam, Ranger Green
OPTIONS	16 combinations – see variant list

PACKABLE UTILITY POUCH

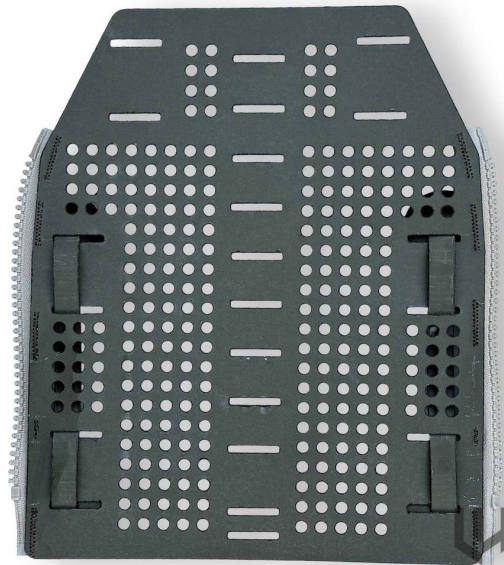

Ultralight roll-top bag that allows ie organizing items inside a ruck while doubling as a SSE pouch.

Wide enough for layering items in a ~110l ruck (clothing on this, sleeping kit under it and water etc over it -> your stuff won't get mixed and reaching bottom items is easy by pulling this out)

Available only in Multicam

DWR fabric (water resistant)

COLOURS	Multicam	
WEIGHT	100 g (packed)	
PACKAGE	100 × 40 × 20 mm	
CUSTOMS CODE	63079098	
ORIGIN	Finland	
MSRP	50.00 EUR incl. VAT 25.5 %

L4 PERFORMANCE

TURTLE REAR BAG KIT

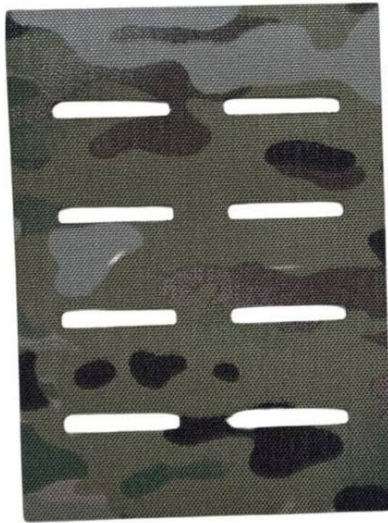

This kit transforms your turtle to a stand alone rear plate bag. Compatible with Maritime L4PC, ATLAS, AVS and other carriers that use velcro shoulder strap attachment + Crye standard cummerbund. Will work with Crye back panels. UCAS panels attach but due to different zipper length there is some overhand:

INCLUDES/

- composite main component
- optional structural velcro shoulder strap kit (not pictured)
- ATLAS and AVS attachment kit (not pictured)

L4 PERFORMANCE

UL HELMET SKRIM

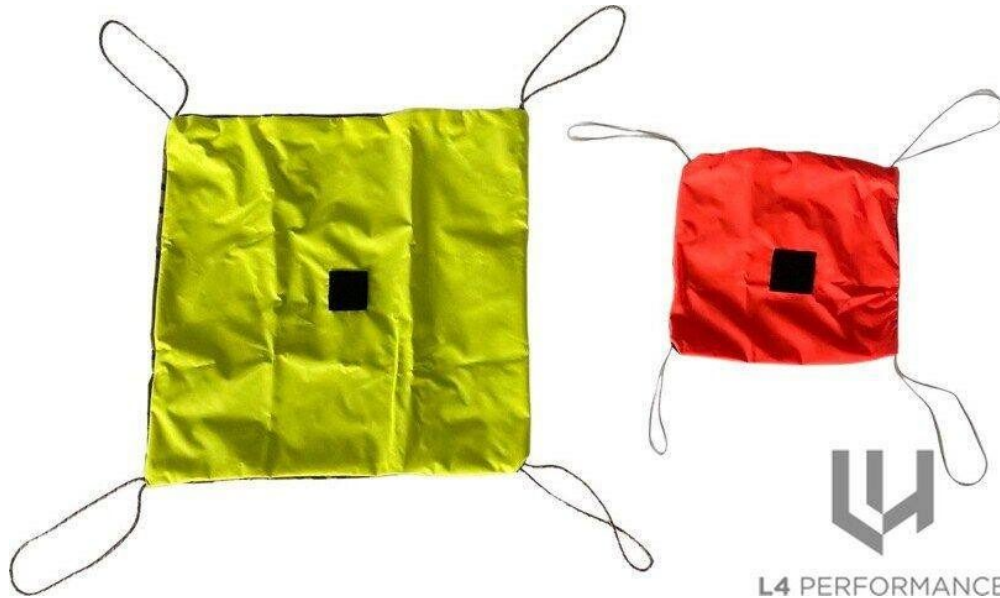

Ultralight helmet skim for high cut helmets.

Weight 22g

Real Tree camo is not NIR-compliant

Skrim is made from UL materials and will tear when caught in branches and such (better to tear than to get stuck on a branch by your helmet). This does not fall under our lifetime guarantee.

UL SIGNAL PANEL

Visible panel in multicam/orange. Packs into its own pocket and 30x30 fits in the calf pouch of Crye combat pants.

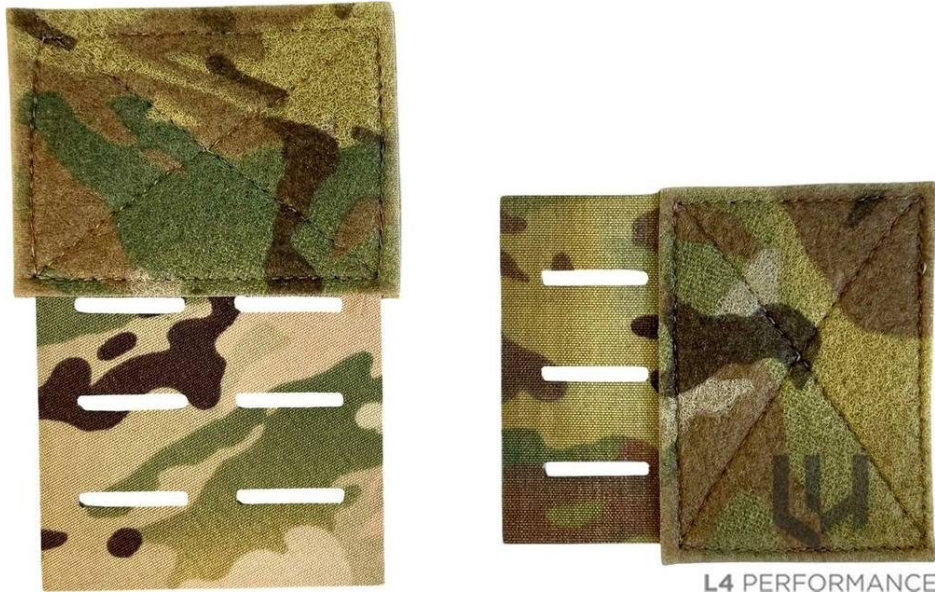

One side has velcro opening so that you can place rocks or sand inside the panel as a weight when the panel is placed on the ground.

4 attachment loops for securing the panel for example to the lid of a backpack. This way you can also use it as a beavertail for helmet storage.
